## **Celebrating 30+ Years of Taking Care of Cars and the People Who Ride In Them**

LEESBURG, VA—Back in 1976, an ambitious young mechanic had a dream to create an advanced auto care concept and he turned that dream into reality when he opened the first Precision Tune Auto Care in Beaumont, Texas. The concept was so popular that he began franchising it and soon Precision Tune Auto Care centers could be found all over the U.S. By the turn of the century, led by the entrepreneurial spirit and dedication of our franchisees, Precision Tune Auto Care had become a recognized global leader in the auto service industry with more than 400 centers worldwide providing diagnostics, scheduled maintenance and repairs.

Throughout our 30+ year history, we have always been experts under the hood and under the car, whether it was the tune-up of the past that fixed many problems with a cap, rotor, wires and plugs or the tune-up of today that means anything from scheduled maintenance to a repair that keeps your car safe and reliable. Precision Tune Auto Care is not the dealership, but we offer the same level of expertise without the inflated price and with much more convenience. Precision Tune Auto Care is not the corner garage, but we offer personal service like the local garage, with the benefit of more access to the right equipment and training and backed by a national chain. We are a professional alternative that is also convenient, with same day service, no appointment necessary, flexible payment options and much more.

In a nutshell, Precision Tune Auto Care is not just another auto service provider. We've been in business for over 30 years, and we have the best-in-class training and service warranties. While we have been experts on cars, we're also focused on the people who drive in them. We understand how people drive, and based on that, we can build a program catered to each person that keeps your car running how you want it. It's how Precision Tune Auto Care is in tune with customers.
