# Road Hazard Warranty

*Coverage for unforeseen hazards of the road & flat repair.*

The Precision Tune Auto Care Road Hazard Warranty is intended to provide additional tire coverage against impact breaks and punctures caused by nails, glass and pot holes, that cannot be repaired. Repairable punctures will be repaired at no charge using the Rubber Manufacture Association (RMA) guidelines.

***NOTE: Damage caused by mechanical irregularities (struts, alignments, etc), improperly maintained tires, customer abuse (improper inflation, wheel spinning, etc), cuts as a result of vehicle accident, run flat tires, customer abuse or vandalism are not covered under this warranty.***

Replacement under the Precision Tune Auto Care Road Hazard Warranty will be pro-rated based on the percentage of usable tread remaining and the current Precision Tune Auto Care price. This warranty is valid two years from the date of original consumer purchase.

This warranty only applies to the original purchaser and the tires mounted and balanced on the original vehicle and DOES NOT INCLUDE TIRES DISMOUNTED FROM VEHICLE AND REMOUNTED ONTO ANOTHER VEHICLE.

***NOTE: If the original purchaser of the Road Hazard Warranty sells their vehicle, then the warranty is invalid.***

To receive the maximum mileage and performance built into your tires, Precision Tune Auto Care recommends that your tires be rotated and re-balanced every six months or 6,000 miles. However, under some driving conditions, rotation and re-balance may be required more often. Precision Tune Auto Care's intent is to ensure that the tires perform up to their potential.

## ***Manufacturer's Workmanship and Material Warranty***

Every tire we sell is covered by a limited workmanship and materials warranty provided by the manufacturer. This warranty covers defects caused by faulty construction or materials and is offered at no additional charge to the customer. Tires found to be defective in workmanship and materials during the first 25 percent of usable tread will be replaced based on the manufacturer's warranty. Tires that are worn beyond the first 25 percent of usable tire tread will be warranted based on a pro-rata adjustment. Usable tread depth is defined as the depth of the tread down to the final 2/32nds of an inch. The last 2/32nds is not considered usable tread.

## ***Mileage Warranty***

The Tread Wear Warranty is offered on selected tires and protects customers from premature tire wear by providing a pro-rata replacement if the tread wears out before reaching the specified warranty mileage. Pro-rata adjustments on tread wear-out conditions are calculated by dividing the number of miles the customer actually received by the mileage warranty.

***NOTE: This warranty is only honored at the store where the tires were purchased. The original receipt must accompany the warranty claim. This warranty does not apply to tires that do not meet manufacturer's requirements and it does not apply to high performance or off-road tires.***
